

DELTATHON

HISTORY

Deltathon wasn't always independent planet in galaxy DELTA BETA GAMA PHI . Four planets: DELTATHON, BETATHON, GAMATHON AND PHILATON used to be connected and all the creatures lived together peacefully. Everything was well until year 2007 when ZETHATONIANS from ZETA Galaxy attacked inhabitants of DELTA BETA GAMA PHI Galaxy. Zethatonians wanted to take The great rock of magic called DELETEN which was in possession of Delthatonians. In this war ZETA Galaxy lost but Delta Beta Gama Phi galaxy didn't win. Only one planet wasn't destroyed and that is Deltathon. Deltathonians needed 10 years to recover from the great loss and to live the same way they used to before.

https://www.google.si/search?q=planet&source=lnms&tbn=isch&sa=X&ved=0ahUKEwiskrSK3NrSAhVF0hQKHXPdWAAQ_AUIBigB&biw=1200&bih=855#imgsrc=IQsk2F3SxTEoMM:

LANDSCAPE

Deltathon was discovered in 2017 and it is very exceptional and special. Weather is always nice only once a year there is snow and it disappears the next day. This planet has smaller gravity beautiful landscapes and no pollution. The best part of it is that Sun changes colour every month. You can see beautiful waterfalls, big lakes, rivers and oceans. During the night water from waterfalls bioluminescent. There coexist many different and amazing creatures. Trees are green, yellow, blue and very rare ones are pink.

https://www.google.si/search?q=planet&source=lnms&tbn=isch&sa=X&ved=0ahUKEwiskrSK3NrSahVFOhQKHXPdWaq_AUIBigB&biw=1200&bih=855#tbn=isch&q=WATERFALLS*&imgc=QBO-JZM7W8E3zM:

CREATURES – DELTATHONIANS

Deltathonians are very peacefull, nice and friendly. They would never attack humans but they would defend themselves. In a fight between human and deltathonian, human doesn't stand a change. On this planet next to Deltathonians coexist mermaids, animals and plants. There is no evil, no enemies, no wars. There are only peace, equality and happines. Deltathonians can communicate with mermaids, plants and animals. If mermaid likes you, she can make your biggest wish come true.

Discover the unthinkable on the planet Ubulu

Landscape

This planet owns a lovely nature. You haven't seen something similar before. Imagine a planet which sustains of different parts of landscape. That is a specialty but also a major danger of that planet. Parts of planet break and then they attach to another planet. Whole galaxy is a space of different planets made of different materials. It is also dangerous to be at a part of the planet which is about to break. Luckily, we know the planet's cycle and we can predict which part of the planet is about to break. One planet in Ulu solar system is basically just a mix of different planets in that same solar system. Perhaps you can't imagine that at the moment but once you are there you will see the beauty and the glory of it. Because of all that planet Ubulu really is magnificent. You will see landscapes of every single planet in whole Ulu solar system.

Picture 1: Presentation showing how parts break and attach

Picture 2: Part of one planet attaches to another planet

Picture 3: Part of a planet is about to break

Picture 4: Landscape current east

Picture 5: Landscape one the current south

Culture

Planet Ubulu is a combination of all cultures in Ulu solar system. Creatures who live there are used of parts of planets which are breaking and then attaching to another planet. Everyone there is nice, helpful, generous and full of understanding.

Picture 6: A resident of Ubulu

History

Many things have happened in history in Ulu solar system. Once before there was a king (he is still alive) who wanted to make his own planet of the floating parts. He hated the fact that parts did not listen to him. After some time, he managed to make his own planet. But just a little bit latter part of his ideal planet broke and went floating back to the Ulu solar system. Thus he destroyed five planets in Ulu solar system. But he didn't know that the planet which he has just destroyed was a part of his soul. Every single planet in Ulu solar system was a part of his soul. Once he realized that he taught if those planets really are parts of his soul how is it possible that he can't control them. Sadly, or luckily that still hasn't been discovered but scientists of the Ulu solar system are trying to figure that out.

Language

Creatures who live in Ulu solar system have a specific language. An Earth's resident would mistake that language and say that their language isn't a language but a sound birds make. Their language is hard to understand hence every visitor will get a small disc injected into their heads. It doesn't hurt and it will be removed once your journey is finished. With that disc you will become a native speaker of Uluzy.

Behavior

Every creature there is very polite and they will love to help you with anything.

How to get there

You will be travelling with a space ship 00345. The ride will take about 3 days. Whole time on board you will be surrounded with billions of facilities such as flying, swimming, massages et cetera.

Picture 7: Spaceship 00345

Where to eat and sleep

You will be able to taste the finest food in your whole life. Their technology is extremely advanced. You will step into a kitchen, close your eyes, imagine the perfect dish and it will be there. You will be sleeping in extremely amazing resorts. And trust us you can't imagine what you will see.

Picture 8: Hotel in the water

Picture 9: Hotel on land

What to see

The main question is what not to see? Everything there is like a paradise. You will see the most beautiful landscapes you haven't been able to imagine never before.

Safety precautions

As I said before parts of planet break and then they attach to another planet. That is why you must stay out of the breaking zone. Breaking zone is the only dangerous part of Ubulu. But don't worry. Getting to the breaking zone is impossible. They are highly secured and impossible to visit.

Don't worry about the breathing. Once you get that disc in your head, not only will your tongue change (that's why you will be able to speak Uluzy) but you will be able to breathe in a different way. That way will make it possible for you to breathe in given circumstances.

Things to do

You should be aware of the fact that it is normal to fly there for any living being. After one day of having a new tongue in your mouth your wings will develop. With those wings you will be able to fly. But be careful you must stay in the k-ozone layer. Otherwise it could happen you would get off the planet and once you get off you would be dead. It is extremely hot once you're out of k-ozone layer and I'm talking about 50000 degrees. So keep that in mind while flying. Let me mention just few of the facilities Ubulu offers. You will swim in the deepest volcanos in lava. You will jump from one tree to another one. You will ride kabaroos. And trust me there is more.

Picture 8: Swimming in lava

Price

We are offering you all of that for only 99999990000000 quorkies. But be careful, if you call now you will get a special discount and you'll need to pay only 99999990000. Amazing? Right?! So call now and make sure you explore the unthinkable, the unbelievable, the best of all.

FUTURE HOUSE PLANET

Future house planet is located in a galaxy called EDM galaxy. From space it looks like Earth, but when you come there it looks something like that:

People came to this planet, because they wanted to have a place only for parties. It was discovered in 2018 and ever since then, parties are going on there every minute of every day.

The planet is one big kingdom called Tomorrowlandia. Kings of Tomorrowlandia are Lucas & Steve, who are also main DJs on most of the parties.

Because Tomorrowlandia is a country it has its own anthem. It is called »Feel Alive« and was made by Lucas & Steve and Pep & Rash.

<https://www.youtube.com/watch?v=0GRXu9ztsiA>

The official languages of Tomorrowlandia are English and Dutch.

People who live there have special abilities such as:

- They never get sick
- They are never tired
- They can't get fat

People there are also very nice, but you have to listen to EDM otherwise they will beat you up.

HOW TO GET THERE:

The only way to get there is by plane. The flight normally lasts for about two days.

PRICES:

Price includes a plane ticket and accomodation. For children (under the age of 14) the price is 5000\$ and for adults the price is 7000\$ (for two weeks).

WHEN YOU GET THERE:

When you get there you will be given some special fashionable clothes which you will have to wear for as long as you will stay there.

RULES:

There are some important rules in Tomorrowlandia (you must listen to EDM, you must wear fashionable clothes, ...) but the most important one is that you must **KEEP CALM AND PARTY ON!**

Picture 1: <http://weknowyourdreams.com/single/earth/earth-05>

Mark Baumgartner 1.a

Luxurious holiday on the planet Garandia

The surface is made up of mostly two types of islands first are large [fantasy-like](#) floating ones and the other are small ones down in the ocean. The climate on the flying islands is something akin to that in Swiss here on earth. They also have [fantastic ski resorts](#) and [mountain lodges](#). Not only that, you can enjoy the fascinating wildlife which, still untouched, lives on the planets lower islands.

The beautiful planet was first

discovered in the Zetta section of the Gamma 265 galaxy. It's original inhabitants were humanoid like creatures, with peculiarly small bodies and long arms and fingers. The majorities complexion is blue, but there were also some individuals whose skin color was different (yellow, green...).

They were relocated to the lower islands where they can be observed more easily. The wildlife here are mostly [different](#) kinds of birds and aquatic creatures. The first of which can be observed even from the hotels, the latter however needs to be approached slightly differently. If you so desire, you can be lowered with a submarine into the ocean and

look at the [mysteries](#) that unfold.

The race you'll be encountering the most are the numoids. An [interesting](#) alien race of short green people with large green heads and tubes coming out of their head. They have learned the ZUD language, so that translators won't be necessary.

The trip there is organized by [the famous Groko company](#) known for it's [fast and affordable](#) travel. Travel only costs from around 50.000 to 100.000 REN. But that isn't the only option for travel, for the more privileged of you who can afford a little extra, you can also have an [intergalactic cruise](#) to the gorgeous destination.

**SO WHY NOT COME WITH US TO THIS AMAZING PLACE WHERE ALL YOUR DREAMS
WILL BE FULFILLED.**

PICTURE 4: [HTTP://WWW.SPACE.COM/11230-WATER-POWERED-SPACESHIP-MARS-SOLAR-SYSTEM.HTML](http://www.space.com/11230-water-powered-spaceship-mars-solar-system.html)

Planet Magni

Planet Magni is one of the best planets in the 27th century, and was considered the best planet in the year of 2786, it is one of the planets that is visited the most. The planet is located in the Fluff Puff galaxy, which is the neighbouring galaxy to the Milky Way, located only 100 billion km away from planet Earth.

Landscape:

The planet is 2 times the size of Earth. No one knows how the planet was formed, because it is a very complex planet, but we can say that it is very unique and there are no other planets same as this one. The planet has one big tree in the middle, known as the Life Tree. It which allows the creatures to breathe, live and because planet Magni does not have anything similar to the sun, the big tree is the source of light and energy. There is an invisible net protection around the tree, which does not allow any unnecessary objects entering the planet, it is a safety protection.

Transportation:

You can get there on a starmo, which is a space machine, only in about 3 hours, because of the starmo's incredible fast speed, 60 km per second.

Basic things to know:

- Habitat: Earth like
- Gravity: normal
- Currency: ti, 1 ti = 100 euros
- Languages: understand and speak all languages
- Power: healing factor

Weather:

People think that it is very cold on the planet, but that is not true at all. There are different weathers and seasons around the planet, so you can travel from one season to another one, and enjoy the weather you like.

Why visit:

There are a lot of interesting things to do on the planet. There are many resorts and spas to relax; there are many movie theatres, and all of the tickets are free. There are also a lot of bars and cafes to have fun and party. You can also have unicorn rides, which are the magical creatures of the planet.

And who doesn't like sleeping? So that is why there are special places for sleep and food only. In Imagni, the technology is at its best, which makes life easier than on Earth.

Safety:

The planet is totally safe.

PLANET IRIS

Are you tired of boring and even dangerous planets like Earth, Mars and Neptune? For just a few millions you can visit and explore the beautiful and fascinating nature of the newly discovered purple planet Iris. It is in a galaxy called Decorus which is full of colorful planets. The planet Iris has 15% lower gravity than Earth. It has even more oxygen than Earth which can sometimes lead to hallucinations.

What makes this planet special is the light that comes from the star Negatilux. Because of it humans can't see anything, but just for 2 millions you can buy special glasses with which you can see in negative colours. It really makes this experience very unique.

The only creatures living on the planet are small but highly intelligent **Gambinos**. They are very friendly, cuddly and always ready to have interesting conversations with you. Their only food is fruit called Sapidus which humans can also eat. They are filled with all essentials for our and Gambinos' bodies. **Warning:** do not eat other plants, because they are toxic!

With underground trains or flying bikes you can explore the amazing nature, communicate with the natives or visit the famous natural pyramids.

If you are an adrenaline seeker you can also take a ride on the wild rollercoasters made by Gambinos or jump from space with parachoots. There's something for everyone!

PLANET PEGASUS

Pegasus, A Description:

A very technologically advanced planet in the heart of the so called Cigar Galaxy. Our planet was created by an unknown. We are called Kobalois. The most advantageous aspects of them all is that Pegasus has the same amount of concentration of oxygen with Earth, which makes it eligible for humans to visit this planet without any masks.

A satellite image of planet Pegasus

Why Visit Us ?

Our planet has a peerless amount of serendipities. In other words you get to choose how this planet looks through your imagination. Imagine anything, and you will have it, we are so technologically advanced that simply the thought of something coming true in our planet is possible. All destructive thoughts will not come true.

How To Get Here:

The process of getting here is not so easy, you will have another planet known as Mars in the another galaxy called the Milky Way. In coordinates: latitude 39847 and longitude 34985, you will find a secret camp called "Site 94". You will then proceed to the teleportation machine and arrive here.

Language, Behavior And Payment:

We Kabolois, do not speak, we communicate through thought. We are generally nice and compassionate creatures, but we do not live in peace. For aliens wanting to join

this planet there is nothing to fear since our wars are fought through thought. To join us you have to pay us 1000 Intergalactic Units of your **blood**. Our currency is alien blood.

Things To Do:

You decide the activities you want, think of what you want to do and that is it. You can practice any activity such as Galactic Horse Riding, Galactic Courses in our planet, or simply imagining that you are living in SuperMansion with everything you want. **The mightiest activity of them all, for us Kobalois is to admire the beauty of our planet's mythical creature, the Pegasus (planet named after it).**

Planet Planet

Planet Planet is a newly discovered planet. It is 220, 597, 870.7 kilometers away from our planet Earth. It will cost you \$200 million to visit planet Planet, for a month. You will be safely transported there with the use of the new teleportation pads. It is really a tropical paradise with a lot of sunshine and beautiful landscapes, it is also under absolute monarchy. Under the rule of and absolute monarch who goes by the name of Pepe the Great. Planet Planet is full of beaches with crystal white sand and turquoise waters. If you are a lover of sunny places then forget any of your favorite resorts and come visit planet Planet, it is the one for you. Though it is really sunny and warm the temperature on the planet is very humid and dank. The temperature ranges anywhere from 50 up to 101 degrees at most. Special suits are given out to the visitors that repel heat to the point at which a human body is comfortable. Due to the amount of heat and sunshine plants start to mutate and you will be able to observe plants move, speak and so on. Gravitational force is 30% less than on Earth while humidity is 70% higher.

Planet Planet:

Name: Planet

Galaxy: Milky Way

Currency: Era

Language: Dank

People: Dummies

Where to stay:

If you visit us here on planet Planet you will be placed in the best and the only hotel here, Hotel Dank. A six star hotel with anything you need. Anything that you imagine and wish of will be immediately delivered right to your feet in a matter of seconds. The most VIP and luxury hotel of all.

Where to go:

Appar from the magnificent beaches on planet Planet you could also visit the King of Planet and witness him at throne.

Here is a picture of Pepe The Great

Planet Spalvingas

1.) THE PLANET SPALVINGAS

Also known as the most colorful planet in the whole universe. Is the perfect vacation destination for anyone who likes to experience something completely different, as it is very different from the planet Earth.

The planet is known for its colorful natural vegetation, and beautiful picturesque views of the mountains. The planet is also one of the least polluted planets in the universe.

<http://www.artsfon.com/download/77642/640x480/>

2.) WEATHER

The planet is known for its interesting weather conditions. At night you will be able to experience the fall of the bioluminescent rain, that will provide you with a new and colorful glow in the dark view of the world around you.

https://www.youtube.com/watch?v=D_d0S3gBJzQ

3.) ACTIVITIES

The activity that the planet is most known for is flying. But no need to worry, if evolution has not provided you with your own set of wings, you will be given a pair of very technologically advanced ones, that will enable you with flying abilities. This way you can see the world from a completely new point of view.

The colorful forests of Spalvingas are filled with millions of small butterflies that are circling around the small lakes.

http://www.wallpaperup.com/69943/digital_art_3d_phantasmagoria_forest_trees_butterfly.html

4.) TRANSPORTATION

Spalvingas is the only habitable planet in the galaxy, the closest habitable planet is more than 2000 light years away. This is Why the only possible transportation to and from the planet is teleportation.

<https://www.universityofcalifornia.edu/subject/term/neuroscience?page=5>

5.) THE MOUNTAINS

In the mountains the rain bioluminescent rain does not fall, because they reach out of the clouds. There you will be able to see the beautiful northern lights that will surely leave you speechless. On your request we can provide you with a flying sleeping capsule that will allow you to spend the night away from the ground under the stars.

<https://www.pinterest.com/pin/331366485058233866/>

The mountains are most known for the beautiful flying animals you can meet there. But we have to remind you that we have a “don’t steal our pets- even though they are fluffy and extremely huggable” policy. If you do not obey it you will face great consequences.

<http://liedeke.deviantart.com/art/fantasy-139301067>

6.) THE MOONS

The planet has 17 moons that tourists can visit. Each of the moons provides you with a completely different type of experience.

The most visited is the Ninos moon. It is the largest one of them and it is very technologically developed. On it you can find the biggest and the most known gaming facilities in the whole universe.

<https://www.pinterest.com/hackrock/future-architecture/>

The smallest of the moons named Blue, is filled with beautiful waterfalls and lakes. There you can experience bungee jumping, diving and futuristic yachting.

http://www.wallpaperup.com/uploads/wallpapers/2012/12/18/25710/big_thumb_9627d9d469e3d56e6c1e6446713eab8f.jpg

Lea Bernik, 1.g

WITA

Travel to this planet is very long, because it is 400 light years from the Earth. We found a way to transport people to Wita. Travel takes 12 years, that's why people will sleep during it. If you pay \$1,000,000.00 more, you can stay on Wita as long as you can and you don't have to come back to the Earth.

On planet you will stay in beautiful hotel, all did of glass. Rooms are for 2-4 people, with bathrooms and small bar. Food and every attraction are in price, so you do not have to pay more on the planet. This planet is very dangerous, so people have to use special glasses tunnels to not be killed by deadly animals or heat. Temperature outside is about 300 degrees all year (25 days). Every attraction is connected by tunnels, so don't worry.

On the planet you can see two types of animals. Both are very deadly. One of them are big birds. They are similar to phoenixes, but are much bigger. Second type are small mice, if one of them will bite you, you die immediately. We didn't find any humans yet. Planet's star is very close, that's why trees and others plants are on fire all the time.

This is THE DOLPHIN PLANET. It is in the peace and joy galaxy.

Firstly let me present the creatures that live here.

70% of all the creatures are presenting the dolphins. Their apperanace is similar to the dolphins that live on the planet Earth. Only they are mostly pink, eventough in that 70% of them there are also hiding some white and grey ones.

MOTHER NATURE

<https://www.bing.com/images/search?view=detailV2&ccid=n1w5qKoU&id=E85DA78D837E946CB52C7EABAE614788C9C1E162&q=dolphins&simid=608047880225882277&selectedIndex=4&ajaxhist=0>

This is how the water mother nature looks like. She doesn't have a body, but sometimes she kinda transforms into a form like that and by that shows us that she is always there for us. That is a picture taken 400 years ago when there was a problem with one dolphins health. She came and rescued him.

As you can asume there is a lot of water in all three forms, consequently. The planet's surface is covered with water by 90%. there are all sorts of waterfalls, lakes, rivers, seas, oceans, streams and even in the air we have so called flying naturally made water pools. The water however is not salty, but fresh water.

<https://www.bing.com/images/search?view=detailV2&ccid=0%2fRylyv6&id=28A3CB91E7BB178E358C89488B649B969D8D26B3&q=oceans&simid=608052943988001550&selectedIndex=1&ajaxhist=0>

There is also a lot of green everywhere.

https://www.bing.com/images/search?view=detailV2&ccid=5x6m%2Fs76&id=24A030F74362596FF115EAA26797072A1F7E60EE&q=paradise&simid=608026242175665260&selectedIndex=11&mode=overlay&first=1&thid=OIP.5x6m_s769KteEWxoPL9a8wEsDv

After dolphins there are ANGELICS that present 28% of the population. They are pure and loving creatures. Their best friends are of course the dolphins. They can breath under water and don't need oxygen to live. In the atmosphere there is so called the RINDU supplies and it's even more powerful than oxygen to people. It gives the Angelics all the energy they need. As for that the angelics don't eat. Because on the Dolphin planet everyone is equal. They don't drink water, however they have lemon juice that is almost as important as the water to humans. But to get it they don't use the lemons, because as said before they leave the plants live. They have telepathic skills. They communicate without speaking only mind reading. Similiar to the Atlantida people. They can also fly and make thing they want real.

There is no means of transport here and no technologies.

They look like angels.

<https://www.bing.com/images/search?view=detailV2&ccid=LmqutacH&id=B3CD9C10824F843EB74667FD285A169D8248A8EB&q=angels&simid=608047068475624509&selectedIndex=9&ajaxhist=0>

We also have nice and gentle music coming out of trees all the time. It is like deep meditations daily.

It is a really beautiful planet that you should see, but you're only welcome if you will respect our nature laws and not demolish our planet. You can visit all the destinations I just mentioned but without your technology and clothes. You have to come here like you're one of us.

But once you are here we promise you that it'll be an unforgettable experience. You can come here by a racket.

PLANET SPORTY

As the name states, planet Sporty is a planet of sport 24/7. Its main specialty is that it has the climate of all four seasons which enables us to do any sport we like, any time of the day. It was discovered by humans in 2701, it is located in the JP Galaxy and it is possible to get there by a Stargate wormhole in less than a minute or by a spaceship in a week. People speak English and French and the whole planet is made for highly motivated, sporty and happy people.

It all started as a place for professional athletes but is turned in to a main tourist attraction. It still hosts all World Championships and World Cups, but it also offers a wonderful place for a vacation. Its very family friendly and offers great hotels and apartments just 5 min from your chosen activities for a very low price. However, tourists and professionals are stated in different parts of the planet to avoid any accidents and misunderstandings. The food and drinks are very high on protein and everyone is in their best shape capable of unhuman strenght and speed. If you want to take a day of to relax, you can visit Lazy City, where the planet offers the best shops of sportswear for Adidas,

Nike, Hummel and Under Armour and some great spots to sit down and relax. Every two hours there is a train to take you on a full planet tour in just a day. You can see every attraction, all of the important stadiums and get to meet a professional sportsman or woman. Even the best of the best need a night off and for that reason every month people gather in the small Party City and parties all night.

Basically the planet is a home to professional athletes and the best place for a healthy and interesting vacation for families and people in love with sport.

Golden Star

You, yes you! Aren't you tired of your early holidays! Don't you want to see a mermaid?! Got your attention then just read!

There is a planet in the outer regions of the Nine Stellar light area called Golden Star. It is one of the rare planets acknowledged as a beautiful tourist attraction by the light Travelling agency. The planet's surface is made 100% out of pure water and instead of earth the land is made out of countless water crystals also called glass water, which are made when water stays at an appropriate temperature for at least a few thousand years.

This is only possible on a planet with a constant temperature of 24 degrees. Additionally this planet has 36 hours per day. As all of the land is made out of water there are naturally a variety of creatures. Some of those include all kinds of fish, giant squids, sea dragons, which grow up to a hundred meters. You might even see a few golden sea dragons.

The skies of this planet are made up of vast and magnificent golden clouds. The clouds extend all the way to space, where because of the special golden mixture of gasses stars are born every day. There the clouds also connect the space stations and allow for the creation of inter stellar satellites which allow the formation of »Gates« which can instantly teleport a giant space craft up to 1 million tons to one of the 15 nerby moons.

Atmosphere:

- 25% oxygen
- 25% humidity
- 50% nitrogen

There are suprizingly no other gasses. Research has shown such gasses all filtered by various plants and never never go above 0.1%.

The gravity is 1.5 that of the Earth, so the gravitational pull is 15 m/s².

We offer an exelent deal, for just 100 stelar chips you can get a small island made of water glass for two weeks. The food is provided by the hired master chief who is sought by even the best 10 star resorts. You can also try catching jelly-jellyfish which only live on this planet. There is also an option of space diving where you can go to a space resort and catch golden space fish which also only live in the special golden clouds. There is of course an all time favorite-sea diving where you can even meet mermaids and mermen. They are the original race of this planet.

As for the wine lovers, this planet has a special wine made from pure golden water (water that was gotten directly from the cloud vine which extends and saps the water droplets directly from the golden clouds). Those that drank it once always had to take some home.

If you want you can also find special »turtle« islands.

Blaž Anžč, I. f

THE PLANET OF HVLTRA

-TIRED OF THE SAME-OLD TRAVEL DESTINATION? YES! -

-WANT TO EXPERIENCE SOMETHING NEW AND EXCITING? WHY NOT?! -

-WELL, COME ON DOWN TO HVLTRA (IN THE PEGASUS GALAXY)

SURE! BUT HOW? -

-WITH THE BRAND NEW TELEPORTER 3000!

*SIDE EFFECTS MAY INCLUDE NAUSEA, LOSS OF LIMBS AND IN EXTREME CASES, DECAPITATION

SOUNDS GREAT! -

SUPPLIED BY THE
INTERGALACTIC TRAVEL AGENCY

PICTURE 1

EXPERIENCE THE UNIQUE CULTURE

THE HVTRIAN PEOPLE

-THE PLANET IS HOME TO THE INDIGENOUS PEOPLES APPROPRIATELY NAMED HVTRIANS. THEY'RE SPLIT UP INTO 21 REGIONS AND HAVE A KING WHO IS REFERRED TO AS "HVAIROPIAN". HVTRIANS ARE KNOWN TO BE HOSPITABLE AND WELCOMING TO ALL CULTURES. THEIR MAIN SOURCE OF INCOME IS THE EXPORT OF THE HUALA PLANT, WHICH IS ONLY FOUND IN THE PEGASUS SOLAR SYSTEM

NOT MUCH IS KNOWN ABOUT THEIR HISTORY BUT FOR THE INFORMATION DISCLOSED TO US IT SEEMS THEY HAVE, SIMILARLY TO HUMANS, EVOLVED OVER THE COURSE OF THOUSANDS OF YEARS

PICTURE 5

NATURE AND LANDSCAPE

-THE PLANET HVLTRA IS FAMOUS FOR ITS BIODIVERSITY. THEIR ENVIRONMENTS RANGE FROM GIANT MOUNTAINS, HUGE DRY DESERTS AND LARGE JUNGLES

PICTURE 6 PICTURE 7 PICTURE 8

INTERESTING FACTS

-BECAUSE OF ITS UNIQUE PLACEMENT IN THE SOLAR SYSTEM RESIDENTS WILL EXPERIENCE NOT FOUR, BUT FIVE SEASONS. THE FIFTH SEASON IS A PERIOD OF HOUR LONG DIAMOND STORMS. LUCKILY THE DIAMONDS DON'T HURT LIVING ORGANISMS.

-ANOTHER CONSEQUENCE OF ITS LOCATION IN THE SOLAR SYSTEM IS A TOXIC GAS THAT IS RELEASED AFTER SUNDOWN. THE GAS IS POISONOUS TO ALL HUMANS AND HVTRIANS. SO MAKE SURE YOU ARE SAFELY AT HOME WHEN NIGHTFALL ARRIVES.

PICTURE 2

ACCOMODATION SITES TRANSPORTATION & OTHER

THE HVTRIAN PEOPLE PRIDE THEMSELVES ON THE FACT THAT YOU CAN FIND 5 STAR ACCOMMODATION ANYWHERE ON THE PLANET, WITHIN HALF HOUR WALKING DISTANCE FROM YOUR CURRENT LOCATION.

THE FOOD AVAILABLE, WHILE EXOTIC, ARE ALL EDIBLE. YOU WILL FIND MANY VEGETABLE DISHES MADE FROM INDIGENOUS PLANTS. MEAT IS ONLY CONSUMED ON SPECIAL HOLIDAYS AND BIRTHDAYS.

THE MOST FAMOUS SITES FOR TOURISTS ARE OF THE NATURAL VARIETY. WITH INFINITY FALLS, THE BLUE MOUNTAIN AND THE MOVING SWAPS AMONGST THE MOST NOTABLE ONES.

THE ONLY WAY TO ENTER THE PLANET'S THICK ATMOSPHERE IS WITH HIGHLY ADVANCED AIRCRAFT, SO WE RECOMMEND YOU USE TELEPORTATION. ON THE ISLAND YOU CAN CHOOSE TO TRAVEL BY VEHICLE OR A MORE TRADITIONAL OPTION, THE RYOTHH (A LARGE ANIMAL).

TO MAKE SURE OF YOUR SAFETY, NEVER LEAVE THE CABIN AFTER NIGHTFALL. UNLESS YOU HAVE EQUIPPED YOUR SPECIAL BREATHING DEVICE. YOU MUST ALSO BE CAREFUL NOT TO DISTURB THE WILDLIFE WITHOUT THE EXPLICIT PERMISSION OF THE GUIDE.
